

1. Admin

Description

The Admin is the system controller responsible for managing and monitoring all activities within the job portal. The Admin ensures proper functioning of the platform, maintains system security, and oversees user and job-related operations.

Responsibilities / Features

- Manage all users (Recruiters and Job Seekers)
- Approve, block, or remove recruiter accounts
- Monitor job postings and applications
- View system usage and activity reports
- Total number of registered users
- Number of recruiters and job seekers
- Number of jobs posted
- Number of applications submitted
- Maintain platform policies and configurations
- Enable or disable user registration
- Set maximum job posting limit for recruiters
- Decide allowed resume file type (PDF only)
- Set job post expiry days

2. Recruiter

Description

The Recruiter represents an organization or employer who posts job vacancies and manages applications from job seekers. The Recruiter uses the system to find suitable candidates efficiently.

Responsibilities / Features

- Register and log in to the system
- Create and manage company profile
- Post job vacancies with required skills
- View list of applicants for posted jobs
- Shortlist or reject candidates
- Review candidate profiles and resumes

3. Job Seeker

Description

The Job Seeker is an individual looking for employment opportunities through the job portal. The Job Seeker uses the system to search, apply for jobs, and receive personalized job recommendations.

Responsibilities / Features

- Register and log in to the system
- Create and update personal profile
- Add skills, experience, and education details
- Upload resume (PDF format)
- Search and apply for jobs
- View application status
- Receive ML-based job recommendations

Machine Learning

- match job seeker skills with job requirements.
